

GEO Analysis Report

Generative Engine Optimization Audit for 360Ghar

Website	https://360ghar.com
Analysis Date	May 06, 2026
GEO Score	82/100 — Good

Good

Executive Summary

360Ghar demonstrates exceptional GEO readiness with an overall score of 82/100. The site excels in structured data (90/100) and technical infrastructure (88/100), featuring comprehensive Schema.org markup including RealEstateAgent, WebSite, FAQPage, BreadcrumbList, and SpeakableSpecification. The platform has outstanding AI crawler accessibility — all major AI bots (GPTBot, ClaudeBot, PerplexityBot, Googlebot, Bingbot, Applebot) are explicitly allowed in robots.txt. The site provides best-in-class AI discovery files: llms.txt, llms-full.txt, ai.txt, and llm-feed.json with structured property data and price snapshots. Key areas for improvement include expanding brand authority through third-party mentions (72/100) and enhancing platform-specific optimizations for Gemini and Bing Copilot (78/100). The content demonstrates strong E-E-A-T signals with verified property data, dedicated locality intelligence, and transparent pricing information across 5 Delhi NCR cities.

GEO Score Breakdown

Component	Score	Weight	Weighted
AI Citability & Visibility	85/100	25%	21.2
Brand Authority Signals	72/100	20%	14.4
Content Quality & E-E-A-T	80/100	20%	16.0
Technical Foundations	88/100	15%	13.2
Structured Data	90/100	10%	9.0
Platform Optimization	78/100	10%	7.8
OVERALL	82/100	100%	82

AI Platform Readiness

These scores reflect how likely your content is to be cited by each AI search platform. A score below 50 indicates significant barriers to citation on that platform.

AI Platform	Score	Status
Google AI Overviews	82/100	Good
ChatGPT	85/100	Excellent
Perplexity	80/100	Good
Gemini	78/100	Good
Bing Copilot	75/100	Good

AI Crawler Access Status

Blocking AI crawlers prevents AI platforms from citing your content. The table below shows which AI crawlers can currently access your site.

Crawler	Platform	Status	Recommendation
GPTBot	ChatGPT	Allowed	Keep allowed — optimal for ChatGPT citation
OAI-SearchBot	ChatGPT Search	Allowed	Keep allowed — enables ChatGPT search integration
ChatGPT-User	ChatGPT	Allowed	Keep allowed — supports ChatGPT user-driven browsing
ClaudeBot	Claude	Allowed	Keep allowed — optimal for Claude citation
Claude-SearchBot	Claude	Allowed	Keep allowed — enables Claude search integration
Googlebot	Google AI Overviews	Allowed	Keep allowed — critical for Google AI Overviews
Google-Extended	Google Gemini	Allowed	Keep allowed — enables Gemini training data
Bingbot	Bing Copilot	Allowed	Keep allowed — critical for Bing Copilot
PerplexityBot	Perplexity	Allowed	Keep allowed — optimal for Perplexity citation
Applebot	Apple/Siri	Allowed	Keep allowed — supports Siri and Apple Intelligence

Key Findings

[CRITICAL] Missing structured authorship on blog content

Blog pages return 301 redirects and lack visible author bylines with schema.org Person markup, reducing citability for AI systems that prioritize expert-authored content.

[HIGH] No Google Business Profile integration detected

While LocalBusiness schema exists, there is no direct link to a Google Business Profile, limiting Google AI Overviews and local pack citation potential.

[HIGH] Limited third-party brand mentions

Brand authority relies heavily on self-published content. External mentions on news sites, industry publications, and review platforms are limited, which affects AI model confidence in citing 360Ghar.

[MEDIUM] About Us page returns 301 redirect

The /about-us page redirects, which may reduce crawl efficiency and lose E-E-A-T signals that AI systems evaluate for trustworthiness.

[MEDIUM] No SpeakableSpecification content implemented

While SpeakableSpecification schema is declared, the CSS selectors (.speakable-summary, .speakable-highlights) need corresponding visible content in the DOM for voice assistant and AI overview extraction.

[MEDIUM] Missing article schema on blog posts

Blog posts lack Article or BlogPosting structured data, which would improve AI citability for informational queries about real estate in Gurugram.

[LOW] MCP server endpoint not widely referenced

The MCP server at api.360ghar.com/mcp is listed in llms-full.txt but could be promoted more prominently for ChatGPT and Claude integrations to drive AI-assisted property searches.

[LOW] OpenGraph image could include structured data

og-image-home.jpg lacks schema.org ImageObject dimensions and alt text optimization, which could improve visual citation in AI-generated previews.

Prioritized Action Plan

Quick Wins (This Week)

High impact, low effort — can be implemented immediately.

1. Fix /about-us 301 redirect to serve a proper 200 response with E-E-A-T content about the founding team, mission, and company credentials
2. Add Article/BlogPosting schema markup to all blog posts with author, datePublished, and dateModified fields
3. Implement visible speakable content matching the declared CSS selectors (.speakable-summary, .speakable-highlights) for voice search optimization
4. Claim and link Google Business Profile from the homepage with a direct URL in LocalBusiness schema
5. Add breadcrumb schema to all inner pages (properties, localities, tools) for better AI navigation understanding
6. Ensure blog pages resolve without 301 redirects for maximum crawl efficiency

Medium-Term Improvements (This Month)

Significant impact, moderate effort — requires content or technical changes.

1. Launch a digital PR campaign targeting real estate technology publications (TechCrunch India, YourStory, Inc42) to build third-party brand citations that AI models trust
2. Create detailed comparison content with original research and data visualizations that AI systems prefer to cite
3. Build out the founder/CEO LinkedIn presence and ensure consistent NAP (Name, Address, Phone) across all social profiles for entity recognition
4. Implement VideoObject schema for 360-degree virtual tour content to appear in AI-generated video carousels
5. Add Review and AggregateRating schema to property and locality pages to enhance trust signals
6. Create a media kit page with downloadable brand assets, company facts, and citation guidelines for journalists and AI systems

Strategic Initiatives (This Quarter)

Long-term competitive advantage — requires ongoing investment.

1. Establish 360Ghar as a primary data source for Gurugram real estate by publishing quarterly market reports with structured data, encouraging AI models to cite price trends and market insights
2. Develop an API gateway for AI assistants (beyond MCP) with OpenAPI documentation to become the default real estate data provider for ChatGPT, Perplexity, and Gemini plugins
3. Build a comprehensive expert authorship program with real estate professionals contributing verified content under their own schema.org Person profiles
4. Create a network of locality-specific microsites with unique, deeply researched content to dominate AI-generated local real estate recommendations
5. Pursue partnerships with government data portals (Haryana RERA, municipal records) to become an authoritative data intermediary that AI models must cite for property verification queries

Appendix: Methodology

This GEO audit was conducted on 2026-05-06 analyzing <https://360ghar.com>. The analysis evaluated the website across six dimensions: AI Citability & Visibility (25%), Brand Authority Signals (20%), Content Quality & E-E-A-T (20%), Technical Foundations (15%), Structured Data (10%), and Platform Optimization (10%).

Platforms assessed: Google AI Overviews, ChatGPT Web Search, Perplexity AI, Google Gemini, Bing Copilot
Standards referenced: Google Search Quality Rater Guidelines (Dec 2025), Schema.org specification, Core Web Vitals (2026 thresholds), llms.txt emerging standard, RSL 1.0 licensing framework

Glossary

Term	Definition
GEO	Generative Engine Optimization — optimizing content for AI search citation
AIO	AI Overviews — Google's AI-generated answer boxes in search results
E-E-A-T	Experience, Expertise, Authoritativeness, Trustworthiness
SSR	Server-Side Rendering — generating HTML on the server for crawler access
CWV	Core Web Vitals — Google's page experience metrics (LCP, INP, CLS)
INP	Interaction to Next Paint — responsiveness metric (replaced FID March 2024)
JSON-LD	JavaScript Object Notation for Linked Data — preferred structured data format
sameAs	Schema.org property linking an entity to its profiles on other platforms
llms.txt	Proposed standard file for guiding AI systems about site content
IndexNow	Protocol for instantly notifying search engines of content changes

This report was generated by the GEO-SEO Claude Code Analysis Tool. Scores and recommendations are based on automated analysis and industry benchmarks. Results should be validated with platform-specific testing.
